

# PHILIP M POWELL

## Lighting Camera

Throughout my time within the industry I have worked on a variety of projects including award winning stop motion animation, drama, documentaries, commercials and music videos.

I am versatile and experienced camera dept member and photographer who is used to working in a variety of environments from documentary crews to large studio based commercial shoots. I have worked for the BBC, Discovery, Dyson and John Lewis, to name a few.

Experienced with motion control, most camera systems both digital & film, dollies, gyros; and has shot from helicopters, hot air balloons, planes, boats, race cars, etc, with small and large crews all over the world. I am equally happy down in the macro world or lighting a big studio.
